Confidential Claim Retracted

Authorized by: SC

Date: 6/30/13

On January 20, 1972, the writer accompanied by Oliver Neie and Vince Pedro of the Bureau of Indian Affairs and Don Kublish, geologist for Mobil Oil Corporation, inspected abandoned drill sites and roads constructed for the drilling programs on Laguna Tribal land uranium permits known as Tracts 2 and 3. The lands involved include 8,266 acres in Township 10 North, Ranges 5 and 6 West, NMPM, Valencia County, New Mexico.

The property was found in a satisfactory condition. This office has not received the last quarter's report and the drill hole information on drilling during this quarter. When this information is received this office will answer your request for a recommendation concerning the relinquishment of the permits.

On September 17, 1971, the writer accompanied by Gilbert Pacheco, Laguna Tribal Secretary; Jim Poncho, Staff Officer; and Don Kublish, Geologist for Mobil Oil Company inspected abandoned drill sites on Laguna Tribal land uranium permits known as Tracts 2 and 3. The lands involved include 8,266 acres in Township 10 North, Ranges 5 and 6 West, NMPM, Valencia County, New Mexico.

Twelve holes were inspected on Tract 3 and found properly abandoned. Tract 2 was not inspected at this time due to rain and road conditions. It is planned in the near future to complete the drill site inspection of Mobil's Phase 1 drilling program.

No drilling is being conducted at this time. Mobil drilled 155 holes on Tracts 2 and 3 under their Phase 1 program. Drill hole data are being analyzed to determine future plans. The engineers of this office will inspect the permits as necessary.

On June 11, 1971, the writer inspected the drilling operations of Mobil Oil Company on Laguna Tribal land uranium permits known as Tracts 2 and 3. The lands involved include 8,266 acres located in Township 10 North, Ranges 5 and 6 West, NMPM, Valencia County, New Mexico.

Mobil drilled 108 holes under their original exploration plan and all of these holes have been properly abandoned. A supplementary plan was submitted and approved to drill an additional 27 holes with the option to drill 19 offset or infill holes. This amount of drilling will complete Phase 1. This work is nearly complete and the holes are being properly abandoned as fast as possible.

Mobil will analyze the drill results and formulate their future plans when Phase 1 is completed. The engineers of this office will inspect the permits at that time.

On March 28, 1971, the writer inspected the drilling operations of Mobil Oil Company on Laguna Tribal land uranium permits known as Tracts 2 and 3. The lands involved include 8,266 acres located in Township 10 North, Ranges 5 and 6 West, NMPM, Valencia County, New Mexico.

The drilling program is progressing at a rapid pace with 78 holes being completed to date. The drill sites have been properly abandoned. No artesian water has been encountered.

The engineers of this office will make periodic checks of the permits as exploration activities progress.

On February 10, 1971, the writer accompanied by Don Kublish, geologist for Mobil Oil Company, inspected the drilling operations on Laguna Tribal land uranium permits known as Tracts 2 and 3. The lands involved include 8,266 acres located in Township 10 North, Ranges 5 and 6 West, NMPM, Valencia County, New Mexico.

The drilling program was started in early January 1971, and to date 44 holes have been drilled. The sites are being properly abandoned as soon as possible after drilling is completed.

The drilling program is on somewhat of a grid pattern on approximately one-quarter mile centers. All the holes except one have been drilled on Tract 2. The holes are drilled through the Jackpile member of the Morrison Formation at depths from 200 to 800 feet.

The engineers of this office will make periodic checks of the permits as exploration activities progress.
